FOR IMMEDIATE RELEASE

FDA and USDA approved Slide Silicone Spray Lube eliminates sticking and squeaking to increase productivity

Chlorine-free VOC-free, biodegradable lubricant has thousands of uses

Wheeling, IL — A universal lubricant, Slide Silicone Spray Lube lubricates all sliding surfaces.

Approved for use on food machinery where no more than 10 ppm residual silicone is imparted to food, Silicone Spray Lube is harmless to plastics, rubber, wood, painted surfaces, fabrics and metals.

An extremely effective, all-purpose lubricant, Silicone Spray Lube is non-toxic, non-flammable and contains no ozone depleting chemicals. It also contains no chlorine and no volatile organic chemicals (VOC's). It has a working temperature range of -100° to 600°F.

Silicone Spray Lube has thousands of uses in hundreds of industries. For example, it eliminates sticky food build-up, and speeds cleaning on heat-sealers, ovens, guides, chutes and conveyors in food processing. It fights sticking and glue build-up problems on slitter knives, rollers and slide guides in paper and film converting. And in the textile and shoe industries, it prevents fabric bunching on sewing and cutting tables and is used on sewing machines, needles, hand irons, trimmers and slitters, skivers and pressing equipment.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
